

# E-CIGARETTES

These battery powered products heat a liquid that contains nicotine and other chemicals.

E-Cigarettes are also known as **Electronic Nicotine Delivery Systems (ENDS)**.

Other types of ENDS can include vaporizers, vape pens, hookah pens and e-pipes.

Nicotine liquids for ENDS are **flavored**, which may increase use by youth.

The **long term health effects** of these products are not known.

Nicotine is **addictive** in any form and **poisonous** in high doses.

ENDS are made to **look like cigarettes**, cigars, pipes, pens and flashlights.

The vapor can release nicotine and **cancer causing chemicals**.

**ENDS are NOT APPROVED as a quit aid by the U.S. Food & Drug Administration (FDA).**
